Our First Year Program
A Note For Parents

Opening eyes • Changing lives

Our Program

Your child's school has chosen to participate in the Sister Schools program this year.

Through pictures and stories, your child will learn about the overwhelming difficulties faced by children in Ugandan schools and orphanages. Following the presentation, a supply drive will be organized and all children are encouraged to participate in ways personally meaningful to them. Both new and used items are accepted.

In the spring, a return presentation will be given showing our children the direct impact of their specific gifts. Our children will see the difference they've made in another child's life.

Sister Schools is a non-profit organization registered in the State of Washington. Our mission is to teach compassion, service and social responsibility by partnering students in Washington State schools with children in Ugandan schools and orphanages. Our students not only gain a greater understanding of the world around them, but also a greater appreciation of the resources and opportunities available to them in their own school. The Sister Schools experience shows all children they can make a difference in another person's life. To learn more about Sister Schools and how you can be involved, visit us at www.SisterSchools.org.
